

The Push-To-Talk over Cellular (PTToC) solution, InteropONE™, enables an authorized public safety first responder to easily create heterogeneous groups on-demand, within minutes.

InteropONE™ is the premiere Software as a Service product of the BKRplay™ software series, produced by P25 public safety communications manufacturer, BK Technologies.

SIMPLIFIED TEAM MANAGEMENT VIA SECURE CLOUD

BKRplay's InteropONE™ is cloud-based and built around three types of users:

STANDARD USER

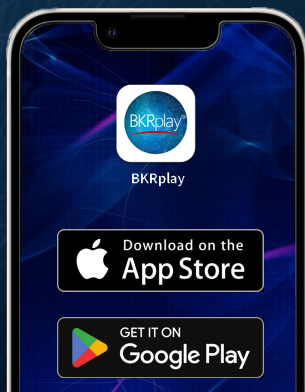

- Standard User has the ability to create on-demand groups containing other InteropONE™ subscribers within their organization

PRIMARY USER

- Primary User has Standard User features plus the ability to create on-demand groups containing at-large users

GUEST USER

- Guest User is the person invited to participate in the incident

KEY FEATURES:

- Dynamic incident group creation including anyone with an active smartphone
- Selectively join one or more incidents; see other users that are also connected
- Integrated private chats and group chats; messaging capability

InteropONE DELIVERS:

- Ease of use – quickly create user groups on demand from your smartphone
- Local control in the hands of Incident Commanders and Emergency Management personnel
- No need to pre-provision gateways
- Service over any carrier network or WiFi
- A cost-effective pay-as-you-go billing model

FAST AUTHENTICATION PROCESS - 3 SIMPLE STEPS TO GET YOU SET UP:

1. Enter the organization ID received from your SMS into the login window
2. Enter your phone number into the second login window
3. Enter the activation code received from the SMS into the next login window
